PROFESSIONAL SUMMARY

Full Stack Developer with a strong back-end focus using .NET technologies (C#, ASP.NET Core, Entity Framework, SQL Server) and hands-on front-end experience with Angular. 3+ years of expertise in building scalable web services, microservices, and data-driven applications. Skilled in integrating payment gateways (Paymob, Stripe), applying clean architecture principles, crafting protected APIs, and optimizing system performance. Solid grounding in design patterns, SOLID principles, and Agile methodologies.

TECHNICAL SKILLS

Languages: C#, C++, Python, JavaScript

Databases: SQL Server, Oracle, PL/SQL, Database Design, Query Optimization, Stored Procedures

Tools: Git, GitHub, Azure, Docker, Postman, Swagger, JWT, Unit Testing, CI/CD

Payments: Paymob, Stripe API Integration

Back-End: ASP.NET Core, Web API, Entity Framework Core, ADO.NET, LINQ, Dependency Injection

Architecture: Clean Architecture, SOLID, OOP, Design Patterns, Microservices, RESTful APIs

Front-End: TypeScript, Angular, HTML, CSS, Bootstrap

PROFESSIONAL EXPERIENCE

Full Stack Developer (.NET & Angular) — April 2025 – Present

Egyptian Takaful Insurance

- Architected and maintained 15+ RESTful endpoints using ASP.NET Core, serving 500+ daily active users across core insurance modules
- Integrated Paymob payment gateway processing 200+ monthly transactions via encrypted API channels
- Enforced token-based authentication and input validation, reducing unauthorized access incidents by 95%
- Produced ERD diagrams and automated report generation from relational databases, cutting manual reporting effort

Back-End Developer (.NET) — June 2021 – September 2021

Egyptian Projects Operation and Maintenance Company (EPROM)

- Engineered 3 ASP.NET MVC applications adhering to industry best practices, serving 100+ internal users
- Optimized SQL Server queries with indexing and query restructuring, reducing average response time by 40%
- Participated in 50+ code reviews and resolved 30+ bugs, improving overall code quality and release stability

KEY PROJECTS

Deep-Fake Media Detection (Graduation Project - Grade: A) *ASP.NET, Flutter, Python, CRNN*

Spearheaded a web platform and mobile app for detecting deep-fake videos using CRNN algorithms. Attained 89.35% AUROC score. Published in IEEE Xplore.

Enhanced E-Commerce API *ASP.NET Core, Entity Framework Core, SQL Server, JWT, Swagger, Angular, TypeScript, Stripe*

Developed a comprehensive E-Commerce API with JWT authentication, product catalog management, shopping cart, Stripe checkout, and modular layered architecture.

Egyptian National ID Field Detector (EKYC) *Python, OpenCV, NumPy, Computer Vision*

Automated extraction of EKYC fields from Egyptian national ID images using region-based detection, signature recognition, and confidence scoring.

E-Learning Full-Stack Model *ASP.NET Core, .NET 8, Entity Framework Core, SQL Server, Angular, TypeScript*

Built a full-stack application for managing school data including departments, instructors, courses, and enrollments with the repository pattern, EF Core migrations, and an Angular TypeScript front-end.

For more details about my projects, please visit my GitHub profile.

EDUCATION

Bachelor of Science in Computing and Information — 2022

Arab Academy for Science, Technology and Maritime Transport

CERTIFICATIONS

Oracle Data Platform 2025 Certified Foundations Associate – Oracle University — 2025

IEEE Conference Paper – Deep Fake Video Detection – MIUCC-22, Misr International University — 2022

Front-End Development – Information Technology Institute (ITI) — 2021

CCNA 7 Introduction to Networks (88%) – National Telecommunication Institute (NTI) — 2021
